Ragnar Tveterås is Professor and Head of Centre for Innovation Research. He is an economist with a master degree from the University of Bergen and PhD from Norwegian School of Economics and Business Administration. His research publications have covered issues such as entry and exit of new establishments, technological change and productivity growth in natural resource based industries, industrial clusters and agglomeration economies. He has headed and been involved in several externally funded national and EU research projects. He has also worked extensively with national and international public authorities, organisations and companies in consulting and advisory capacities. Tveterås is a board member of the Norwegian Research Council’s Food Programme.
